

2018 Global Altair Technology Conference to be held in Paris, France

April 18, 2018

World's leading digital design event to discuss transformative commercial applications of Simulation-Driven Innovation™ from October 16-18

TROY, Mich., April 18, 2018 (GLOBE NEWSWIRE) -- [Altair](#) (Nasdaq:ALTR) will hold its 2018 [Global Altair Technology Conference](#) at the Palais des Congrès in Issy, Paris, France from October 16 –18. This year's event will focus on sharing amazing applications of Simulation-Driven Innovation from technology leaders and industry executives from all over the world. Deep technical sessions and presentations on latest technology trends such as IoT and the digital twin, e-mobility, electric vehicle design, and the impact of IoT, AI and machine learning on influencing the future of design, will demonstrate how enterprises can effectively leverage simulation, optimization, and HPC to deliver outstanding products and experiences.

"Simulation, optimization, cloud-based HPC, and the Internet of Things are coming together to transform how innovative products are brought to market," says James Scapa, Altair's Founder, Chairman, and CEO. "As we move forward into an era of machine learning and artificial intelligence, opportunities will grow for the convergence of technology and emotion into great designs!"

The Global Altair Technology Conference will bring together industry leaders, product designers, and technology practitioners to help them guide their enterprises to success in the world market. The conference will feature something for everyone with workshops on October 16 that are premier learning forums for the latest technology from Altair technical experts. October 17 will offer a full day of inspirational keynotes, and October 18 will include deep technical sessions on over 10 simulation topics including electromagnetics, crash and safety, fluid dynamics and model-based development. Previous Altair Technology Conferences have included technology leadership speakers from organizations including Ferrari, Airbus, Daimler, JLR, NASA, and Ford.

For more information on the Global Altair Technology Conference, including exhibition and sponsorship opportunities, please visit <http://www.altairatc.com/paris2018>. Those interested in speaking at the event are invited to submit their abstracts to email atcpresentations@altair.com.

About Altair (Nasdaq:ALTR)

Altair transforms design and decision making by applying simulation, machine learning and optimization throughout product life cycles. Our broad portfolio of simulation technology and patented units-based software licensing model enable Simulation-Driven Innovation for our customers. With more than 2,000 employees, Altair is headquartered in Troy, Michigan, USA and operates 69 offices throughout 24 countries. Altair serves more than 5,000 customers across broad industry segments.
